WOODEN FLOORING

### MASSIF PINE FLOOR BOARDS 28X95mm, NATURE

Wooden flooring with massif pine boards is an authentic choice and adapt perfectly to log house atmosphere. Pinewood is naturally insulating, floor is comfortable to touch and warm during winter.

Dimensions: 28x95 mm

Profile: tongue and groove

Type: massif pinewood

Finishing: planed, nature

Quality: Class A, extra dry 8 – 10%, healthy knots, traces of heart wood, no fissures, no color defaults.

Recommendation for assembly:

To nail or screw directly on wooden joists or nailing boards on concrete slab.

Recommendation for finishing:

Fine sanding and varnish / wood oil / wax

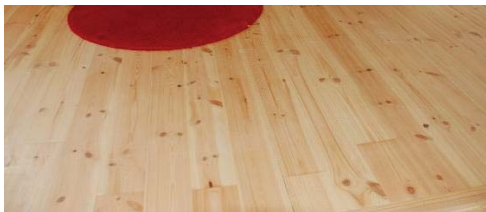

Note: not compatible with floor heating systems, not recommended for humid areas (bathroom)

Other choice:

We can propose also:

- oak flooring

Contact us for further info.

WALL CLADDING

### LOG PANEL, NATURE

Cladding for walls and partitions with log panel is both authentic and natural. Cladding has the same profile as logs and allow mixing log walls together with timber frame structures and cover extra insulation frame of outside walls. Applying wood stain, oil or wax will give beautiful color tone while keeping natural wood texture visible. Painting with opaque color create contrast and enable to change atmosphere.

Dimensions: 19x169 mm / 20x195mm / 20x220mm / 26X272mm

Profile: tongue and groove

Type: planed pinewood (spruce also available)

Finishing: nature

Quality: Class A, healthy knots, no fissures, no color defaults.

Recommendation for finishing:  
Wood stain / wood oil / wax / painting

Other choice:  
Available a variety of profiles and type of panels to satisfy all requirements. Contact us for further info.

**Finishing:** opaque painting  
create contrast and change  
atmosphere

TERRACE & BALCONY

### TERRACE BOARD PINE 28X95mm impregnated, brown

Impregnated pinewood board is a safe solution, tested and approved, for building wood decking, garden, patio, pergola or any other outside construction exposed to rain. Grooved anti-slip surface is not slippery even when wet.

Dimensions: 28x95 mm / 28x145

Profile: planed on four sides, anti-slip grooves

Wood: massif pinewood

Finishing: impregnated with brown color tone

Quality: Class AB for decks and all outside constructions exposed to rain but without direct contact with ground.

Installing:

Leave a gap between deck boards. Nail or screw directly to deck joists or nailing boards on concrete slab

Recommendation for finishing:

Boards turn to grey by the time due to UV exposure. Maintenance with wood stain, oil or painting will allow keeping nice color tone and making cleaning easier

Other choice:

Available also:

- thermo-treated pine
- Siberian larch
- composite boards

Contact us for further info.
